250 Tonnes AUMUND Conveyors for new Cement Plant in Uzbekistan

PRESS RELEASE

AUMUND Fördertechnik 250 Tonnes AUMUND Conveyors for new Cement Plant in Uzbekistan

Rheinberg/Germany, January 2018

In May 2017 AUMUND Fördertechnik GmbH won the order for three drag chain conveyors with capacities from 7.5t/h to 200t/h for discharge of limestone, gypsum and pozzolan for the new cement plant in Sherabad, Uzbekistan. In October 2017 an order for another LOUISE type AUMUND drag chain conveyor for discharge of clinker dust rounded off the package.

The complete package being put together by AUMUND Fördertechnik for the customer Almalyk Mining and Processing (AGMK) amounts, however, to more than 250 tonnes of machinery. In 2018 AUMUND Fördertechnik will supply to Uzbekistan no less than ten belt resp. chain bucket elevators with capacities from 21t/h to 500t/h, and centre distances between 16.6 and 120 m. The heavyweight of the delivery is the pan conveyor, with a centre distance of 148 m and a conveying capacity of 300t/h for clinker. The clinker conveying system comprises two further AUMUND pan conveyors with the same

According to official sources, Uzbekistan would like to increase its cement production to 8.9 million tonnes by the year 2020. The new plant in Sherabad is a major factor in this equation. From 2019 the intention is that cement production will run at a capacity of 1.5 million tonnes of Portland Cement.

About the AUMUND Group

The AUMUND Group is active worldwide. The conveying and storage specialists have special expertise at their disposal when dealing with bulk materials. With their high degree of individuality, both its technically sophisticated as well as innovative products have contributed to the AUMUND Group today being a market leader in many areas of conveying and storage technology. The manufacturing companies AUMUND Fördertechnik GmbH (Rheinberg,
