*Contact your local AUMUND office for more information

From A to Z – all-around maintenance

Extended warranty on full AUMUND machine*

Extend the existing warranty of your new AUMUND equipment or add a warranty to your existing AUMUND machines, via OEM AUMUND parts, and comprehensive maintenance packages. Full machine warranties of one or two additional years available, depending on the package chosen.

*Terms and conditions apply. Contact your local AUMUND office for more information.

Inventory Consulting

Effective inventory planning is critical to operations and production. Carry too much and you tie up capital but carry too little of a crucial part and you jeopardize uptime and productivity. AUMUND understands the importance of the ideal balance and will work with your maintenance, warehouse, and procurement teams to ensure you have the parts you need.

OEM Spare Parts Pooling

The AUMUND spare parts pooling program is designed to identify common requests and parts needs between AUMUND machines in one plant, or between multiple machines in multiple facilities. We identify opportunities to bundle purchases and inventory opportunities for pooling in your warehouses or AUMUND's own warehouses for better resource planning and reduced lead times.

PREMAS® Inspections

The AUMUND PREMAS program provides an in depth, physical inspection including measurements of critical components, function tests with detailed analysis and recommendations for immediate, short, and long-term maintenance, repairs, spare parts, and upgrade suggestions. The PREMAS® program is recommended and available for AUMUND and non-AUMUND conveying machines.

PREMAS® 4.0 – Predictive Maintenance Solution

Go to maximum capacity with additional safety and knowledge about the condition of your machines. PREMAS® 4.0 enables the early detection of wear and aging of important machine components at your bucket elevator, anywhere, anytime – based on predictive maintenance.

Remote Support, 24/7 Support

AUMUND is dedicated to customer service. That is why we are available on your schedule. We have technical support available 24 hours a day, 7 days a week to answer any emergency concerns that may arise. Remote support via augmented reality headsets is also being offered from many of our locations globally. So that we can see what you see and support you more efficiently and effectively.

Shared Maintenance Planning Assistance

AUMUND Field Service Consultants, and engineers work together with your maintenance teams to provide you a complete analysis of your equipment, maintenance, and operations requirements. We provide your team with maintenance best practices, recommendations for maintenance repair, development of a maintenance plan, and root cause analysis of defects or untypical wear.

Training

AUMUND training / AUMUND Days offer customized training for maintenance staff and machine operators by experienced AUMUND trainers. Training is offered on-site, via videoconference, or off-site for larger groups in a conference center. These sessions cover all necessary wear measurements, troubleshooting, maintenance best practices and procedures for all types of AUMUND equipment.

Secure high machine reliability, achieve operational excellence – with PREMAS® 360° Packages
